Two friends making Farmion alongside their jobs, from the Netherlands and Estonia.

in the game

landscaping · seasons & weather · crops, trees & flowers · livestock · farm quests · farmbot drones · villages & markets · processors · café, buffet & restaurant · grocery store · flower shop · your own home · stockpiles · farm levels · skill trees · greenhouses · offline progress · roads, lights & fences · decorations · pets · solo or co-op

farm through the seasons

Shape the land and plant crops, trees and flowers. Keep livestock and look after them. Rain, snow and wind change the farm through the year, and greenhouses let you grow in any season.

build a village

Markets sell your produce over time, processors refine it into new goods and stockpiles add storage. Nicer surroundings make buildings better, so a pretty market holds more stock.

run your own businesses

Cook dishes in a café, buffet or restaurant for the big money, sell raw produce fast in a grocery store, or arrange bouquets in a flower shop to earn prestige. Each business has its own skill tree.

let the robots help

Set up FarmBot drones to tend your fields, so you can spend your time where you want it.

make it home

Build and furnish your own house, then decorate the farm with roads, lights, fences, decorations and pets.

do it together

Play solo or with friends in online co-op. The farm level decides what everyone can build, quests push the farm forward, and your own progress extends your tractor's reach. The farm keeps going while you're offline.
